Forecast for Friday 27 Nov 2020

Weather: Areas of mist and low cloud will form in the valleys through the early hours, clear skies away from these. Any low level fog will gradually clear through morning with skies predominantly clear otherwise giving some lengthy spells of sunshine for much of the day. Cloud will descend widely from the south through late afternoon along with spells of rain.

Chance of cloud free mountain/hill tops above 600m: 90%, falling 10% through afternoon as cloud becomes widely extensive above 400m.

Visibility: Generally very good, but quickly deteriorating later in the day as low cloud and rain set in.

15:00 on Thu 26 Nov 2020	0.2mm	7mm	9mm

Forecast for Saturday 28 Nov 2020

Weather: A widely overcast day with extensive low cloud across the hills as well as some patchy rain or drizzle through morning. Cloud tending to thin and break later in the day to leave a clearer evening, but to an uncertain extent.

Maximum wind: East 10-15mph.

Chance of cloud free mountain/hill tops above 600m: 20%, with the best chance across west or northwest foothills. Otherwise, cloud extensive above around 300m.

Visibility: Widely very limited with fog conditions across large areas, but likely much improved across the west, such as across Black Mountain.

Temperature: **Valleys:** 2-4C rising 6 or 7C.
At 600m: 3 or 4C.
Freezing level: Above summits.
